

INVITATION

“RISE OF THE ROBOTS”

Market Opportunities in the German Robotics Industry

December 1, 2021

Germany Trade & Invest (GTAI) is pleased to invite you to the “Rise of the Robots” digital seminar on Wednesday, December 1, 2021.

Robotics & Automation (R&A) is helping set the pace of digitalization of industry and production across the globe. With the highest robot density level in Europe, Germany is the most important investment location in Europe for Japanese companies in the R&A field. Both countries are leaders in R&A development, with industrial robot use in Japan and Germany at a comparable level.

Industry and service sector use of robots – and the development of robot applications in completely new application areas – will see the global market grow significantly over the next decade. Germany is ideally placed to benefit from this thanks to its position as a leading industrialized nation. The significant market potential in Germany – and in the regions in transition in particular – provides excellent opportunities for Japanese technology companies to enter the German R&A ecosystem and participate in its development.

Germany Trade & Invest will guide you through the R&A landscape in Germany, and help you identify suitable partners, relevant research and technology clusters and untapped market potential in Europe’s growing R&A market.

We very much look forward to welcoming you to this digital event.
