

**OVERVIEW**

JETRO’s Invest Japan Business Support Center provides support to innovative foreign companies with the latest market information to help them in designing their Japan market entry strategy. We would like foreign companies to explore Japan as their investment destination and be catalyst in transforming the Japanese ecosystem for the better.

For our next online seminar, we will invite ENEOS Holdings Inc. (formerly known as Nippon Oil). They will provide an insightful overview of the Energy sector in Japan and introduce the Open Innovation activities of ENEOS.
